

PRESS RELEASE

E-TECH EUROPE 2022

*The trade fair dedicated to innovative electrical and electronic technologies for
Electric Vehicle production*

Over 200 exhibitors, 5 thematic exhibitions, 2 days of conferences, workshops and training sessions, organised in collaboration with the most important sector associations, industry and universities. Exclusive test drives of two and four-wheeled electric vehicles, an area entirely dedicated to Universities and Startups, electric Hypercars and E-motorbikes on display, and much more at one of the first sector fairs in Europe to return live in 2022

12 and 13 April 2022

BolognaFiere Exhibition Centre

West entrance, Piazza Costituzione, 40128 Bologna
Hall 19

Hours: 9.00 - 18.00 both days

For information: +39 02 6630 6866 | www.e-tech.show

Bologna, 30 March 2022 - On **12 and 13 April 2022** the leading players in the **2.0 Electricity** and **zero-emission electric mobility industry** will meet at the **BolognaFiere exhibition centre** for **E-TECH EUROPE**, the B2B fair dedicated to innovative electrical and electronic technology for the production of Electric Vehicles.

The recent goal set by the **European Commission** to achieve **climate neutrality by 2050** will inevitably include the reduction of emissions produced by vehicles. The electric mobility industry, which is already showing encouraging signs of growth, is destined to develop further as it is asked to play a crucial role in the ongoing energy transition.

Based on this scenario **E-TECH EUROPE 2022** promises to be a reference point to respond specifically to the challenges posed by the changes that are already underway.

The event that brings together companies, research centres and professionals in the sector is an unmissable opportunity for specialised operators to do business, to network, get updates, discover the latest market trends and test-drive leading technology.

In the heart of the **Italian E-Motor Valley**, in an exhibition area of over 12,000 square metres, **over 200 companies** will showcase the best of Italian and international technologies and production: in these sectors, as in many others, Italy is at the forefront of the world, with businesses ready to seize the opportunities offered by the next electrical and electronic revolution.

E-TECH EUROPE Exhibition is divided into **5 thematic halls** dedicated respectively to **batteries, supercapacitors, technology for electric vehicles, electric motors, metals, materials and recycling** — themes that are fundamental and transversal to different production sectors, not only in the automotive world, but also to utilities, renewable energy, energy storage, networks, and logistics.

In addition to the 5 display halls, a dedicated area of the pavilion will host **FORTRONIC 2022**, the foremost event in Italy for **power electronics**, organised by **Tecno** with the support of **Assodel** (Association of Electronics Districts - Italy).

New trends and technologies, from energy management to electronics for electric motors and intelligent mobility, will be exhibited in this area.

E-TECH EUROPE 2022 will also offer a **full program of conferences, workshops and training sessions**, to delve into the key themes of the current technological revolution: from technological innovation, to the production of components, from the procurement of raw materials to their disposal and recycling.

There will also be various **special events** such as **Test Drives** of electric motorcycles and vehicles in the area outside the pavilion, **Hypercars and electric superbikes on display**, and an area dedicated to electrical projects developed by **Universities and startups**.

E-TECH EUROPE 2022 is an outstanding business, meeting and training opportunity for all players in the sector. It is organised in compliance with anti-Covid regulations in order to guarantee the safety of exhibitors and visitors.

The **E-TECH EUROPE 2022** exhibitor list, conference program and link to request a free test drive are available online, as well as the pre-registration form, which allows free access, in total safety and without queues, to the exhibition areas and events over the two days.

E-TECH EUROPE 2022 is an event organised by **A151 srl** in collaboration with the foremost sector associations such as **A.I.N.F.** (Italian Association of Metal Finishing), **ASSOFERMET**, **ASSOMET** (Italian Association of Non-Ferrous Metals Industries), **ELETRICITÀ FUTURA** (Italian Association of Electrical Companies), **EUROBAT** (Association of European Automotive and Industrial Battery Manufacturers), **KYOTO CLUB**, and **Motor Valley**.

The appointment with **E-TECH EUROPE 2022** is set for next **12-13 April** at **BolognaFiere** exhibition centre.
