

PRESS RELEASE N° 1

## E-TECH EUROPE 2023

*The second edition of E-TECH EUROPE set for a comeback at Bologna  
Exhibition Centre next spring*

**19 and 20 April 2023**

**BolognaFiere Exhibition Centre**

*Bologna, 26th October 2022* - After the great success of its last edition, which brought **more than 200 national and international exhibitors to Bologna in 2022, together with over 3.400 trade show visitors from 55 countries, E-TECH EUROPE returns to Bologna Exhibition Centre** - all primed to welcome still more companies and visitors. As trade show its second international edition will be held **from 19 to 20 April 2023**, spanning two pavilions all dedicated to the battery industry, as well as technologies for electric vehicles and E-mobility.

**E-TECH EUROPE** has proven its great importance as reference and meeting point for the entire automotive supply chain - for both Italy and Europe. Already many companies have reconfirmed their attendance - no less numerous than the number of those set to participate for the first time: from manufacturers of individual electrical and electronic technologies to component developers to finished vehicle manufacturers.

A wealth of innovations will be on display at **E-TECH EUROPE 2023** - all featuring an ever more comprehensive product range. The show's traditional thematic halls catering to **Batteries, Supercapacitors, Technologies for Electric Vehicles, Electric Motors, Metals and Materials** will each be there while **EAS - ELECTRIC AUTO SHOW 2023** is simultaneously hosted: showcasing the most innovative electric vehicles, together with **RE-BATTERY 2023** as event specially dedicated to the collection, sorting and treatment of batteries for electric vehicles and E-mobility.

In addition to these halls, a dedicated area of the pavilion will host again **FORTRONIC 2023**, the foremost event in Italy for **power electronics**, organised by **Tecno** with the support of **Assodel** (Association of Electronics Districts - Italy).

New trends and technologies, from energy management to electronics for electric motors and intelligent mobility, will be exhibited in this area.

# E-TECH EUROPE 2023

2<sup>ND</sup> EDITION

**THE AUTOMOTIVE ELECTRIFICATION INDUSTRY**  
European Exhibition and Conference on Advanced Batteries  
and Technologies for Electric Vehicles and E-Mobility

**19-20 APRIL 2023**  
**BOLOGNA EXHIBITION CENTRE - ITALY**

**WWW.E-TECH.SHOW**

Besides its exhibition aspect the event will, as always, include a **rich programme of conferences, workshops and seminars** to stay abreast of this growing and evolving industry.
